For any startup to succeed and thrive, they will need to build a team of talented and motivated employees. Who are these people that choose to join a startup in its earliest stages? What does their job actually look like? How did they even find and apply for that job? What if I want to work alongside startups but not directly in one? We will cover these questions and more with a panel of speakers who have successfully navigated a path from student to early startup employee, or to a non-traditional, entrepreneurship-adjacent role. If interested, please [register via this link](#).
